

TEETH START GROWING EVEN BEFORE YOU ARE BORN

THAT IS WHY SOME KIDS ARE BORN WITH TEETH

EGYPTIANS HAD FORMED TOOTHPASTE OVER 5000 YEARS AGO.

WHILE THE WHOLE WORLD WAS USING TWIGS AND ROOTS TO CLEAN TEETH

LIKE FINGER PRINTS EACH PERSON HAS AN UNIQUE TONGUE AND TEETH PRINT

SNAILS HAVE MORE THAN 1000 TEETH AND MOSQUITOES HAVE 47

HISTORY

Dr. R. V. Anjarlekar established one of the very first dental clinics in Dombivli and since then, for past 46 years, has been serving the needs of Dombivlikars. He was joined by his son Dr. Mandar Anjarlekar and daughter-in-law Dr. Shweta Anjarlekar in 1999.

This city has seen them grow from a small dental center, to two state-of-the-art facilities equipped with equally impressive technology and trained personnel, performing modern day dental procedures efficiently. Anjarlekar's are here to provide a lot more than just the common, everyday dental care.

20TH DECEMBER IS CELEBRATED AS LOVE YOUR TEETH DAY IN CHINA

REGULARLY CLEANING TEETH PREVENTS HEART DISEASES

TOOTH DECAY IS THE SECOND MOST COMMON DISEASE APART FROM COMMON COLD
